How to Make a Poster with the tool

Three steps from a written idea to a finished poster. No design software, no layout skills.

1

Describe your poster

Write the subject, style, mood, palette, and where the title should sit. The more specific your prompt, the closer the tool lands to the poster in your head.

2

Pick a model and generate

Choose a supported model and run it. The tool renders portrait poster art from your prompt in seconds and shows it in the workspace.

3

Refine by re-prompting

Not quite right? Adjust the wording — a bolder headline, a different palette, more negative space — and generate the poster again until it fits.
